SMARTSTRIPS App

SMARTSTRIPS App

USER'S MANUAL

SmartStrips™ App is an innovative concept that makes the accuracy of laboratory immuno-enzymatic assays (ELISA) available to veterinary practitioners for use in the clinic or on the farm.

SmartStrips™, developed by BIO-X DIAGNOSTICS, introduces a new generation of robust, accurate quick tests (quantitative results possible) that include a data transmission module connected to your computer network or LIMS.

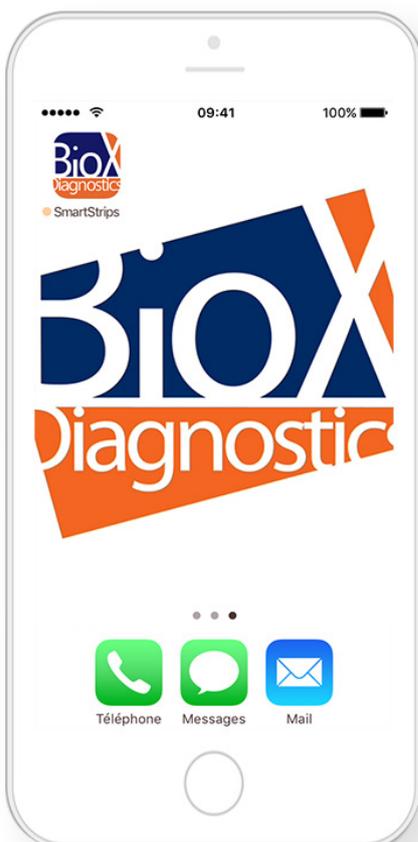

SmartStrips™ App is used with a simple smartphone and requires no special equipment, fastidious handling or laboratory expertise. It is proposed as a means for reading the results of our SmartStrips™ quick diagnostic tests:

- as an alternative to reading “positive/negative” test results with the naked eye.
- as a system for reading/interpreting all tests that require semi-quantitative or quantitative results.

* : Currently available on iPhone and iPod Touch devices with IOS 10 and higher.

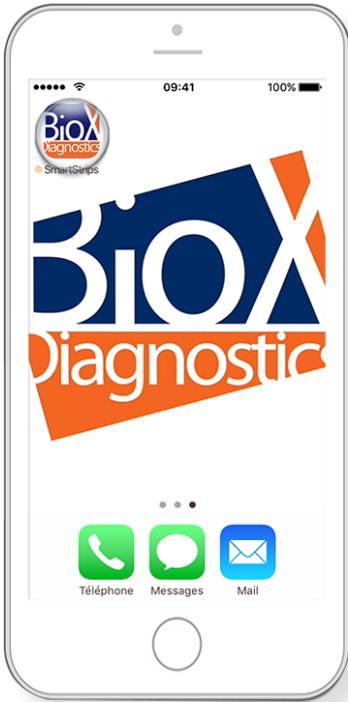

SMARTSTRIPS™ App works like a sequential toolbox with the following functions:

- to recognise the test parameter via the QR code printed on the device;
- to read the test (automatic visual capture);
- to interpret the results, which may be of various types (positive/negative, positive/dubious/negative, semi-quantitative (value intervals), or quantitative, depending on the parameter);
- to create files (per animal, batch of animals, farm, etc.); and
- to export data (test results, date, location, comments, and attachments) to a remote computer or server.

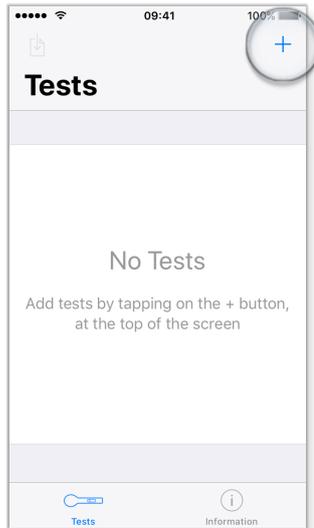

USING SMARTSTRIPS™ App

Adding a test

■ Launch SmartStrips™ App on your smartphone.

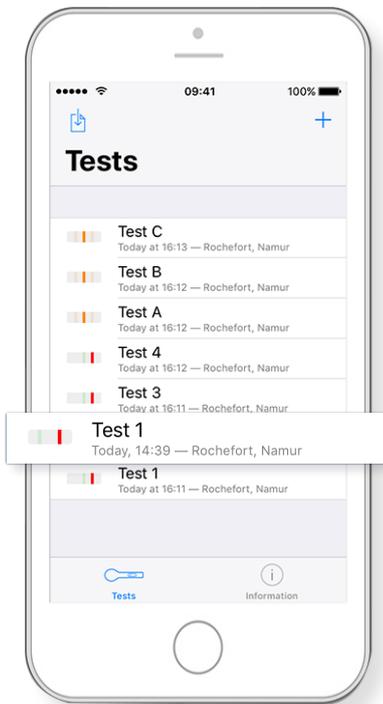

■ Add tests by touching the "+" button at the top of the screen.

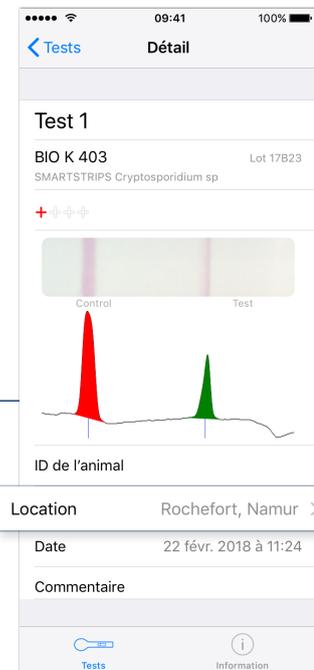

■ The application detects the SmartStrips™ device automatically and captures the test area.

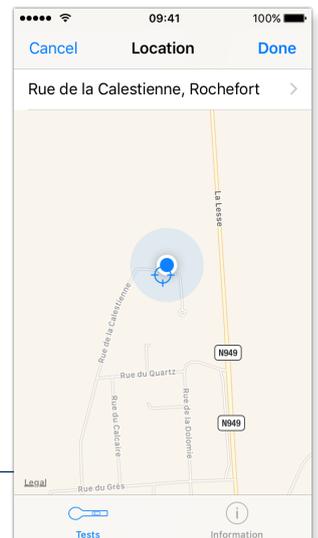

Reading the results

■ Open a test.

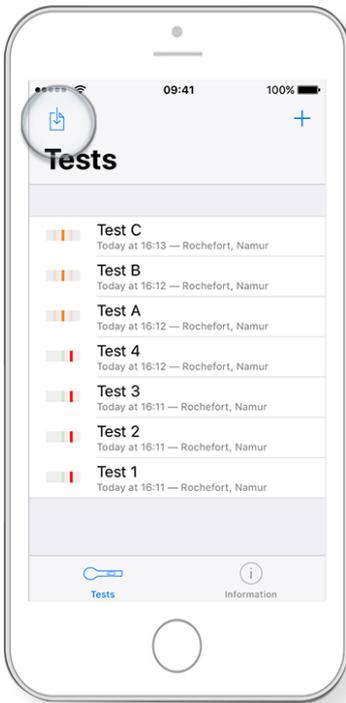

■ The **Detail** page gives all the general test information.

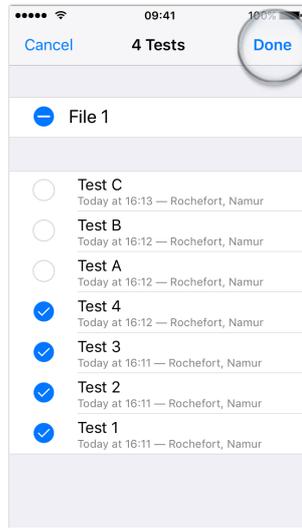

■ The **Location** page gives the location of the test.

Creating/Exporting a results file

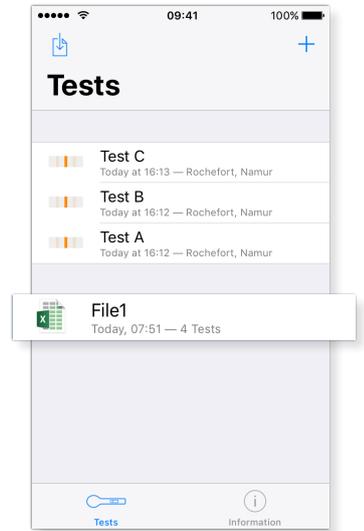

1 Creating a results file

Start by creating a file.

Select all the tests that you want to include in the new file and rename the file.

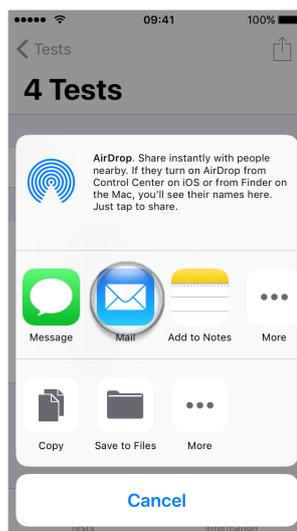

Your file has been created.

2 Exporting a results file

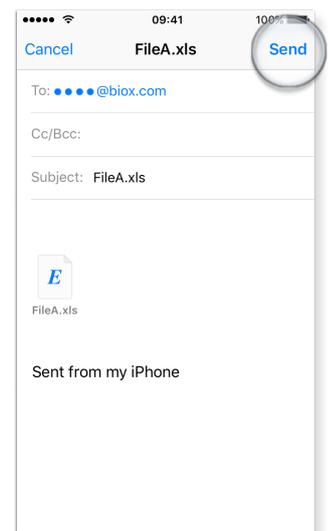

Open the file.

Touch the export icon in the upper right-hand corner of the screen.

Touch the icon for sending e-mail.

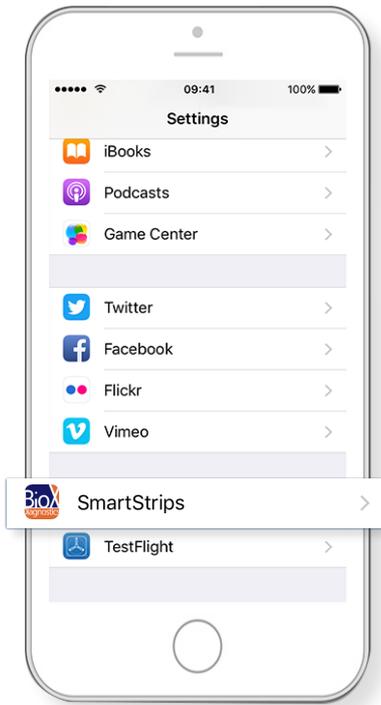

Enter the recipient's e-mail address and type your message.

Touch "Send" to send your e-mail.

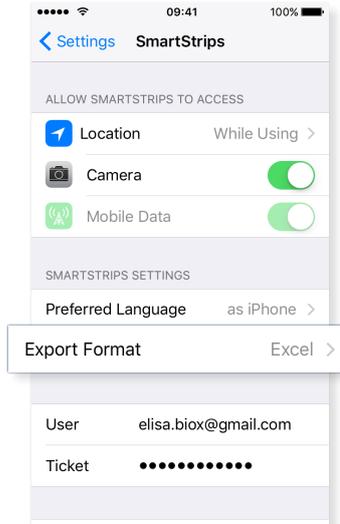

Consult your results on a computer.

Choosing the format for exporting results

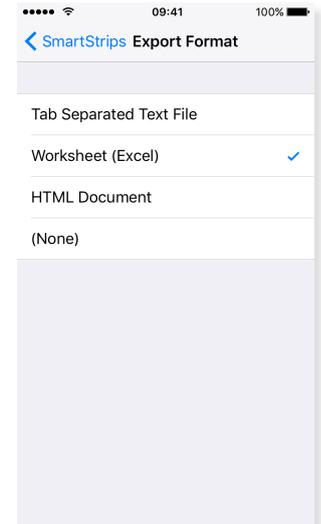

Go to the "Settings" option of your smartphone and find "SMARTSTRIPS".

SmartStrips™ App proposes three export formats. It is possible to change these formats in the application's settings.

Go to "Export Format".

SmartStrips™ App proposes three formats:

- Text
- Excel
- HTML*

Excel

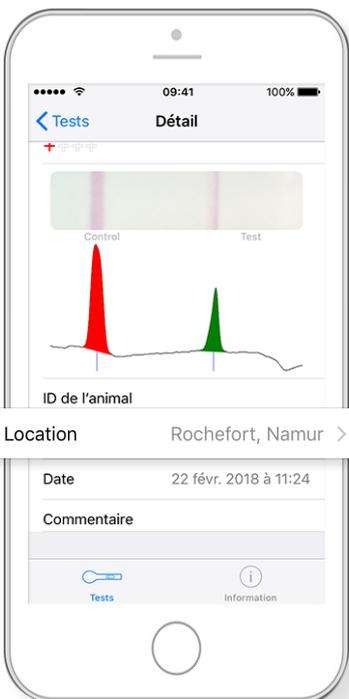

#	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O
1	#	Title	BIO K	Product name	Result	Date and Time	Location	Animal ID	Comment	Tags	Level	Latitude	Longitude	Ratio	Language
2	10	Test C	399	SMARTSTRIPS IgG - sang	6,2 mg/ml	17/10/2017 16:13	Rocheftort, Namur				0	50,1853172	5,206485422	0,939426798	fr
3	9	Test B	399	SMARTSTRIPS IgG - sang	6,4 mg/ml	17/10/2017 16:12	Rocheftort, Namur				0	50,185346291	5,206510389	0,913155807	fr
4	8	Test A	399	SMARTSTRIPS IgG - sang	6,8 mg/ml	17/10/2017 16:12	Rocheftort, Namur				0	50,18532654	5,206410059	0,85568254	fr

HTML

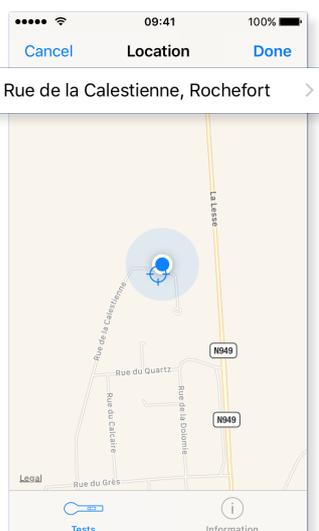

#	Icon	Title	BIO K	Product name	Result	Date and Time	Ratio	Preview	Image
10		Test C	399	SMARTSTRIPS IgG - sang	6,2 mg/ml	17 oct. 2017 à 16:13	0,93942679803324		
9		Test B	399	SMARTSTRIPS IgG - sang	6,4 mg/ml	17 oct. 2017 à 16:12	0,913155806539		
8		Test A	399	SMARTSTRIPS IgG - sang	6,8 mg/ml	17 oct. 2017 à 16:12	0,85568253988254		

*The HTML format lets you export the views of your tests via your web browser

Setting the location of a test

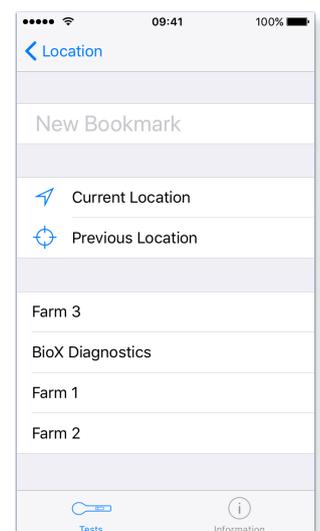

Open a test and touch **location**

SmartStrips™ App detects the location of the test automatically.*

Touch the address to change it.

*Permission required in the application's settings.

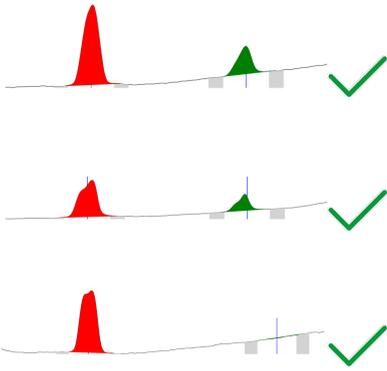

Personalise the location by adding a name or by choosing an existing name.

OPTIMAL CONDITIONS OF USE

Validation of Analysis

Valid analysis

Invalid analysis

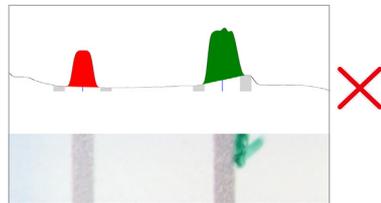

Non-centered test spike with negative surface.

Non-centered control spike with negative surface.

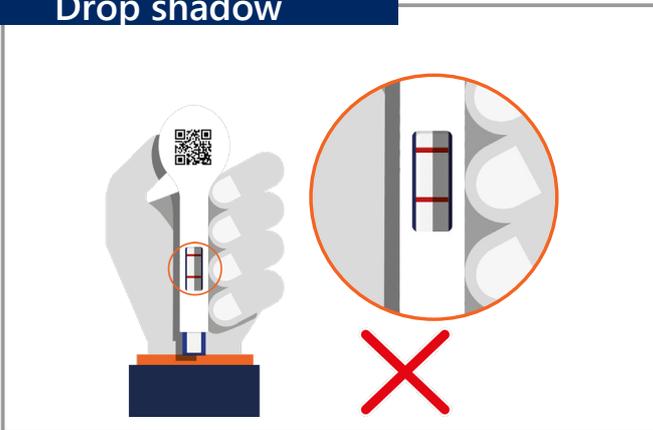

Test spike not centered and not interpreted.

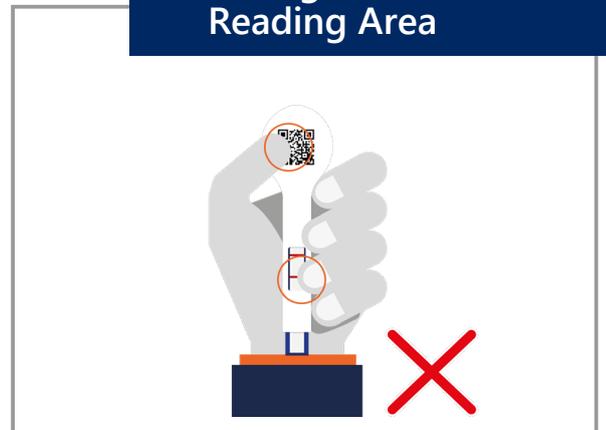

Detection of dirt / stains on strips.

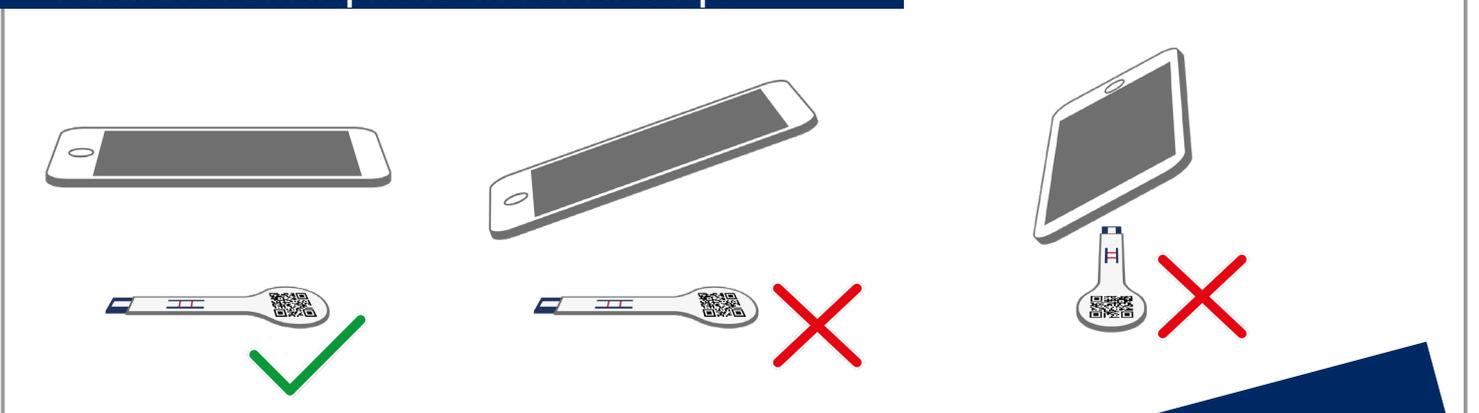

Drop shadow

Hiding the QR Code & Reading Area

Parallax of Smartphone and SmartStrips
